Great Soundtracks.

Listening to it.

Now I want to play Finding Paradise one more time.. "I never stood up very tall..."

Starts crying. Finally it come out.

Im relieve that it isnt coming in 7 years.

You should have this if u like the game Finding Paradise. **Yes. Just yes.. for those who are hesitating about to purchase or not to purchase the soundtrack, it's worth every penny, those soundtracks are lovely and peaceful as good as To the moon soundtracks are, enjoy the music :). I love Kan Gao's work as a musician. The only issue I have is that Watt's ringtone was not included in the soundtrack, as Eva's was included in the to the moon soundtrack. Overall, I recommend if you have played the game and love the music as much as I do.. A soundtrack that is as haunting as it is beautiful.**

This is the warm hug that everybody needs when they finish the game. Thank you for another job well done, I will be listening to this on repeat for a long time to come.

Thank you.. this soundtrack is so beautiful. cried when wish my life away played lol. Getting the soundtrack after finishing the game is a must for Kan Gao and Laura Shighara's games.. The Best :)

Thank god it wasn't actually being released in 7 years. Finally i can listen to this beautiful soundtrack <3

Thanks.. Every bit as pleasing to the ear as the To the Moon soundtrack.. This is a kind of music that you can listen for all day.

Just like Dr. Neil Watts would say, "Totally Worth it.". This is a wonderful soundtrack. I would say best of 2017.. All of my yes. What a different yet beautiful way of changing the plot compared to To The Moon. Soundtrack's great as usual.. Love every single piece in this! The bonus track by Chris Ryker and Undertone is awesome too.. This is my second favorite video game soundtrack of all time.

8.4/10 IGN. Oh no no I am not ready for this... ;_;

I was so eager to get this that I kept refreshing for a good 15min before the release, only to realize it's still too soon to go back into these emotions... What a fool I am...

This Scale Theme is killing me again... still, in the sweetest way possible... like a razor-sharp spoon scooping my heart. Oh no I can't stop now... ;_;

Might be still too soon for you, too, people. Be aware.. Beautiful music.

Why does the release date say "Dec 31, 2021"? When I hit 'Play' with this soundtrack, onions being cut materialize all around me.
