Arc System Works

Publisher:

Arc System Works

Release Date: 11 Jan, 2016

a09c17d780

English,Japanese,Korean,Simplified Chinese,Traditional Chinese

---

Theres nothing new to say. Zuma is an old classic Popcap game that deserves all its praise, being unbelievably addictive, yet brutally hard, it balances it surprisingly well, and if this was your childhood game like it was mine, it's well worth the nostalgia to pick up. But I recomend you get the sequil, possibly the best cassual game outside of Plants vs. Zombies.. This game nearly broke me, I've never played a game less ready for Early Access than this. This game is in a pre-Alpha state. So many menus are just place holders, your characters tongue is sticking out the side of his throat at all times, the AI is unable to find each other on most of the maps and the list goes on and on. This game should be less than a dollar while in early access if the creators are looking for a test bed for a completely broke game. I will eat my mouse cord if this game every reaches a "proper" release state. For those of you with thin skin or weak consitutions, don't watch my review. DO NOT BUY in this state.

<https://www.youtube.com/watch?v=M9Cze4yvJ1s>. You know all of those ♥♥♥♥♥ top-down shooter .IO games? Take those, add satsafying, fast and dynamic mobility, make it look good graphically, include great sound design, as well as unique and interesting weapons. While not too many people play the game, it certainly gives a great first impression. However, given the basic concept of games like these, I honestly cannot see it really going anywhere, and I probably will not play it consistantly for over a few days. Overall, I would most certainly recomend downloading this free game, and if you decide you like it, then maybe get the DLC to support wherever the hell spas takes the game.. Wish there were less people who thought they were gods at D -. It's a bad game, so first that suck and to conclude 2 euros for this demo it's very expensive.

[Don't buy this "game". This is my favorite visual novel as of yet. I can't wait until the rest of the series becomes available in english.. well first things first what i dont like, i dont like moening i like to look at the ups of the game so things i dont like, somebody did mention about the curser and yes sometimes you cant see it it. also what is sometimes annoying is that you do get bombarded with eniemes even in easy but you have a lot of health so i do see reasons.](#)

[now on to the good things. the timeing and the music is brilliant love it so much. the lights and all of the textures are good. also the moving around is smooth you dont jag around its a nice smooth movement.](#)

[things i would like them to add](#)

[i do see that they are going to add 4 or 5 more songs but i think for a £14 it should be a bit more than just 9 songs.](#)

[i did get it today though 22/06/2014 and it was on half price £7 so i got a good deal.](#)

[also if they could add custom spirets so instead of being that head phone thing maybe other types of headphones or diamond shape or something.](#)

[so all in all as it is still in developmant probably about a 7/10 great game just needs a bit more work. ITS SO ♥♥♥♥ING AWESOME!](#)

[Interesting missions](#)

[Charismatic characters](#)

[Awesome gameplay where RPG, RTS are mixed.](#)

[Pretty good story for RTS.](#)

[However, there are some problems.](#)

[Game crushs sometimes](#)

[There is bad optimization in cutscenes for monitors with 16/9 resolution.](#)

[. Very addicting, very in depth game that takes alot of planning and thinking. Alot of fun playing this game. I think this is alot better than Football Mogul 18. I just wish the graphics were alot better.. Not a bad puzzle game but too difficult and too random for my liking. The levels are way too big and one mistake means you have to reload and do it all over again. I would probably give it a 5V10.](#)

---

Game is fun even for an old game but multi-player only works on lan not over the internet.. Very good. Never played such a great game before!
